

GO-DEVIL 12' X 5'

FLOATING DUCK BLIND

Go-Devil's new 12' x 5' Floating Blind is capable of allowing four men to hunt very comfortably out of the rain and cold wind just like the original Floating Duck Blind but with a smaller profile. It is designed to be used without a motor and can be towed with boat, ATV, or UTV to its hunting destination. This 12' long 5' wide aluminum barge can float in 8" of water loaded with men and hunting gear. The duck blind comes equipped with a .125" slick bottom, pipe sockets and spud pipes to anchor the blind in position, fence wire to hold grass or brush, built in shelves for storage, 12 volt dome light, roll down tarp to keep rain out, front and rear door for easy access, and low front wall to accommodate young hunters. The Floating Blind is available in a standard or low profile model.

Extra options include a bilge pump; jack up legs, super seats, battery and battery box, and detachable tongue and axle for towing with and ATV.

The floating blind gives hunters the ability to move to different locations and hunt in the comfort of the finest blind that they have ever seen! If you have more questions call us toll free at 888-490-3254.
