## **WATER TRAP/FUEL FILTER**

**NO. 14**

**DATE: 10/10/02**

**RE: ALL GO-DEVIL MODELS ON REMOTE TANKS**

The majority of our service problems are related to water in the fuel. For this reason, we highly recommend for customers to run a water trap/fuel filter on their engines that are running on remote tanks. We offer a water trap/fuel filter for \$60.00. This is a screw on filter that bolts to the transom of the boat. The customer will unscrew and empty the filter a couple of times a year. The filter should be replaced once a year.
